This coin was found in the neighborhood of an obscure Russian town, where Mr. Edwards purchased it from a local dealer in antiquities, into whose hands it had just fallen. It is remarkable that neither seller nor buyer had, at the time, the slightest idea of the rarity and value of this coin, — a much finer specimen, and heavier by 16.6 grains than the one in the British Museum. The coin has been submitted to all experts in the United States, whose opinion is unanimous, and is unanimously recognized as a genuine, authentic, and original specimen of the gold coinage of ancient Athens. Should the purchaser desire to submit this coin to some special named European authority, before absolute purchase, a private arrangement to this effect can be made at the time of sale.
